

CD Cover Design in Paint.NET

Assignment:

Now is the chance to put together all we have learned so far and create a CD cover. You can use an existing band/group or, even better, make up a group.

Search the internet for photos to use, but make sure you are not copying any logos, CD covers, etc. Use as many tools, fonts, layers, opacities, and filters as you would like!

Requirements:

- Size: 4.75 inches (square)
- Use of at least one photograph to create your CD cover
- Include the artist and title
- If time allows, create a back cover.

Need some inspiration?

Check out the [99 Best Designed Album Covers](http://inspiredology.com/99-best-designed-album-covers/) (according to the writer of this blog)

Or search for one of your favorite covers @ [sleevage.com](http://www.sleevage.com)

Many bands/artists will include lyrics, biographies, and other information about the band on the inside pages, like a book rather than a cover. Design your band's inside pages!
