

Typography in Paint.NET

Option 1:

Choose a song that you know most of the lyrics to. The song **MUST BE APPROPRIATE!**

Use the typography (text) tool to type the lyrics to your song and create a unique design on your page. Use different size fonts and font styles. You may type the lyrics to the entire song, or just a few lines.

Option 2:

Write a letter to a famous person. The person may not be a criminal, etc.

Use the typography (text) tool to create a visually appealing design with your letter. Use several different font styles and sizes. Change the font to highlight important words or points.

VERY IMPORTANT--You will **need** to use several layers to be able to move/edit your text!

Requirements for BOTH options:

- Size: 4.75 inches (square)
- Add a new layer for each line or section of text that you create!
- At least 2 different colors (plus white)
- At least 3 different font sizes
- Visually appealing! (This means it has to look good and draw people's attention!)
- Fill up at least half the page.

One more time:

VERY IMPORTANT--You will **need** to use several layers to be able to move/edit your text!
